DigiMark 440 Frontlit Banner
product specification

The popular choice for all general banner applications, the PVC Frontlit 440 range produces great results with solvent, eco-solvent, uv-c, screen and latex inks.
It has been developed to optimise colour reproduction whilst still maximising ink adhesion, offering rigidity, durability and longevity.

properties		test method	result
Total weight (s.q.m./gr)		DIN53352	440
Tensile strength (N/5cm)	Warp Weft	DIN53354	635 451
Tearing Strength (N/5cm)	Warp Weft	DIN53356	125 107
Peeling Strength (N/5cm)		DIN53357	>60
Temperature resistance (Degree Celsius)		DIN53372	-20 - +70
Width			Up to 3.2M
Base fabric (Dtex/fd/Inch)		DINIS02060	300 x 500
Density		DIN60001	18 x 12
Fire Rating		(DIN4102-1-1998)	Available on request

notes:

Available widths: 760mm to 3200mm

Physical properties: data represents typical values and is not intended for use as a specification
