prepare	print	apply
keep the surface clean and free from dust before printing	print the material trim each transfer ready for application	temperature: 140 - 160°C for 7 seconds medium pressure hot/cool peel

Suitable for cotton, polyester and poly/cotton blends. Not suitable for dye sublimated garments.

recommendations

Use latex gloves when handling - fingerprints can affect the print quality.

Remove any excess glue powder from the film.

A test print and cut before each use is highly recommended due to variations in conditions of usage.

Please wait 24 hours after pressing before washing

Do not use bleach or other aggressive chemical agents
